

NS SERIES

powered by
Microsoft® Internet Security & Acceleration Server

If your business relies on Microsoft® applications, you need the NS Security Appliance.

Top Ten Reasons Why You Need the NS Series Security Appliance

- 1. Application-layer firewall protection:** By defending at the perimeter and application layer, the NS Security Appliance provides the best protection for critical Microsoft applications like Exchange, IIS, SQL and SharePoint. In addition an array of third-party content filtering application security plug-ins are available.
- 2. Strong VPN functionality:** For end-users and branch office environments, the NS Appliance provides strong and cost-effective VPN functionality with native support for Microsoft VPN with no end-user licensing fees.
- 3. Web caching:** Only the NS Appliance provides both forward and reverse Proxy Web Caching.
- 4. SSL bridging:** Only the NS Security Appliance provides the ability to inspect all application-layer encrypted traffic as it passes through the firewall.
- 5. Secure, forms-based authentication:** The NS Appliance allows for the authentication of users at the firewall, including native Active Directory integration and support for two-factor authentication.
- 6. Secure hardened platform:** To ensure a stable firewall with a minimal attack surface, Network Engines invests significant engineering resources to harden the operating system and limit access to the Secure NEWS™ (Network Engines Web Services) interface.
- 7. Update management:** Network Engines engineering teams and the NEWS interface pre-qualify and manage all upgrades, patch fixes and other management tasks that pertain to all software running on the appliance.
- 8. Ease of installation:** Choosing the ISA 2004 application on the NS Appliance provides you with the fastest track to protecting your network.
- 9. Advance replacement policy, one-stop support:** Should you encounter a problem, Network Engines guarantees replacement anywhere in the country within 24 hours. Our technical support program provides customers with one number to call for all hardware and software issues.
- 10. Proven track record:** Since 1997, Network Engines has partnered with some of the largest software companies in the world to provide appliance products to their customers.
